Mental health impacts our world deeply

80%

of Africans that need mental health support are not receiving the care they need

>50%

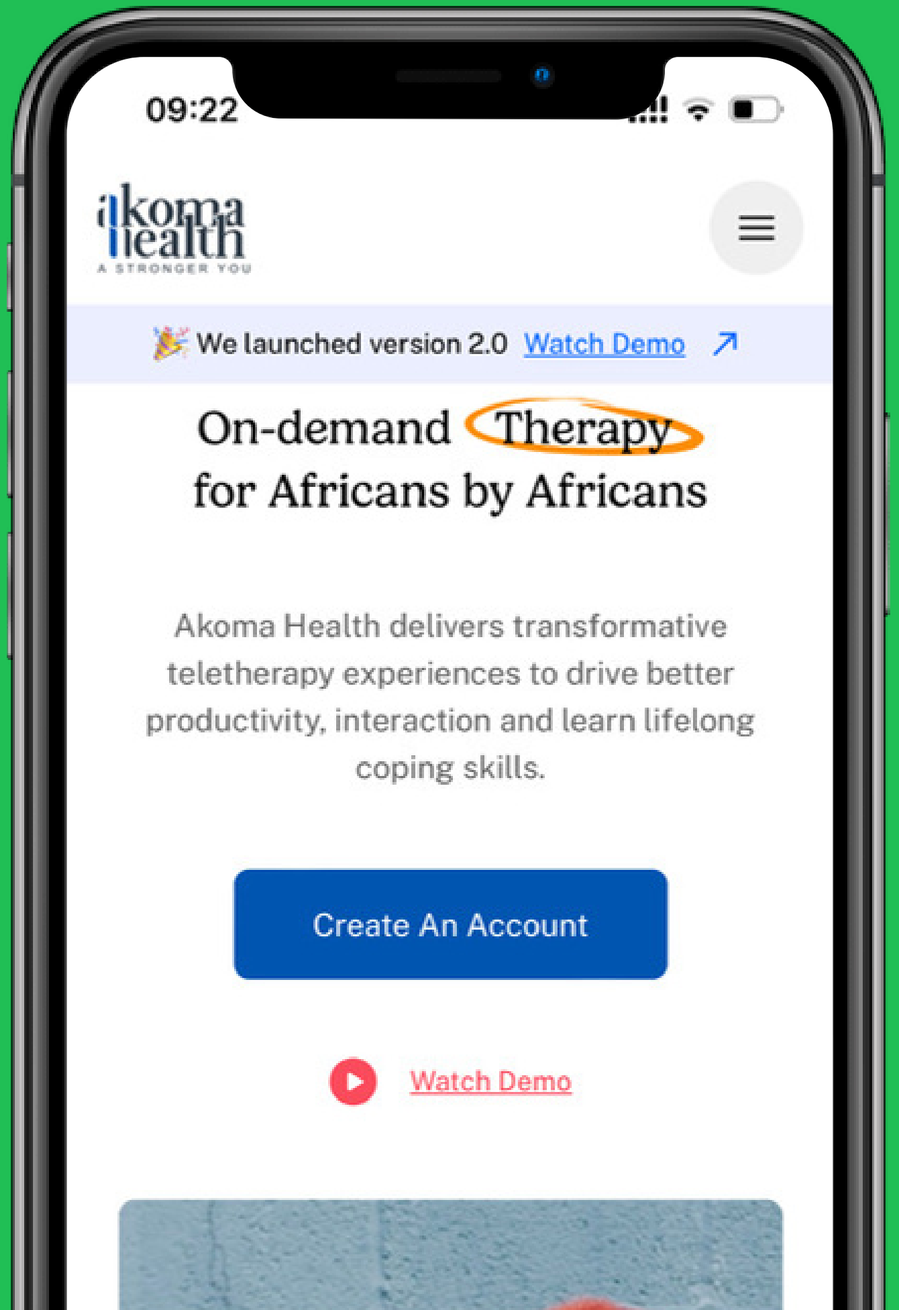
of African youths experience depression and/or anxiety

40%

of African youths experience behavioural issues that affect their ability to learn

6/10

countries with the highest suicide rates are in Africa



Akoma for you

Akoma Health's tailored well-being programs offer a holistic approach. We seamlessly integrate with insurance companies, to empower Africans with the essential skills, resilience and comprehensive coverage to foster all round well-being, and reduce overall healthcare costs.

High Quality

95% of our mental health professionals are Clinical Psycholgists with Doctorate degrees.

Expanded Reach

We have almost 50 Psychologists in 3 countries, who speak a multitude of African languages.

Enabling Technology

Chat and Whatsapp features, and a preference questionnaire that create a seamless experience.

Personalised Experience

We have religious counsellors. Users can filter for age, gender, ethnic preferences.

Case Study

Meet Ify!

Ify is a 34-year-old professional who found herself trapped in a cycle of sleeplessness and inexplicable arrhythmia.

Problem

Ify saw multiple doctors, who prescribed beta blockers and more. This resulted in hypotension.

Akoma

Through a recommendation, Ify saw an Akoma Health psychologist. With thorough assessment and empathetic listening she was diagnosed with anxiety.

Solution

With consistent therapy and dedicated mindfulness practices, she gained valuable insights into the roots of her anxiety from where she could get better.

User wellbeing scores improved by 30% in just 6 months!

"My therapist made me feel like I could be vulnerable."

"I didn't feel judged."

"My therapist was patient and took time to explain things."

"My therapist was friendly and open."

"My therapist was calm and empathetic."

Next Steps

We want to partner with you to extend accessible and comprehensive mental health services, fostering holistic well-being and early intervention.
